HOW TO CHOOSE A TENNIS RACKET

Each of the manufactures has a different method of categorising rackets. We have simplified the whole process for you. We have given each racket a power level based on: 1. The speed of the ball off the racket- we have tested all the rackets. 2. The head size- the bigger the racket head the more powerful the racket. 3. Thickness of beam- the thicker the beam, the more powerful the racket 4. Weight of racket- Light rackets (225g to 280) is generally more powerful. Medium rackets are generally (280g to 300g). Heavy rackets are generally (300g to 340g) these are control rackets.

So which type of racket should you go for?

CONTROL RACKET

Plenty of control and feed back from the racket.
Would suit: Advanced players playing club team or tournament tennis Players with longer or full strokes. Players who have problems controlling the ball. Good adult sized juniors.

MID CONTROL/POWER

Nice mixture of power and control.
Would Suit: Club or recreational players who hit the ball reasonably well. Advanced players who need more power. Adult sized junior.

POWER RACKET

Very user friendly. Easy to serve with, volley with. Very easy on your body.
Would suit: Recreational players who have a short back swing.

Each Racket will have the following symbols to help you:
W - Unstrung weight in grams • **H** - Head size in square inches.
B - Beam width in millimetres • **P** - Tennis nuts power level

LOW TO THE GROUND COURT FEEL
WITH ADDED LATERAL STABILITY**

Critical factor is midsole height. Difference in height ratio of heel to toe = Heel Drop. The lower the Heel Drop value (the lower the midsole height), the easier it is to land and stay on your forefoot, thereby providing better stability and court feel.

R-dst® MIDSOLE
This lightweight material provides superior cushioning in the heel and improved rebound in the forefoot for faster response.

DYNAMIC FEEL (DF1)
New approach to building Tennis Footwear that provides a lower to the ground court feel & more comfortable performance feel in and added lateral stability for improved on-court movement.

DURALAST OUTSOLE
Upgraded outsole material with an entirely new design that improves court traction and grip for maximum wear and durability.

GT - Graphite - Tungsten Technology

Concentrated at 3 and 9 o'clock on the string bed, the combination of carbon and remarkably stiff Tungsten fibers makes the racquet twice as stable as standard carbon frames, for less torque and greater precision.

Cortex Active Technology: Intelligent vibrations filters

Every time a racquet hits a ball, it generates thousands of vibrations, hundreds of which cause discomfort, while others help players get a better feel for the ball. Since each player has different needs, Babolat has designed a system with three new types of dampeners to enable all types of players to find just the right amount and kinds of sensations to suit their specific style and preferences.

CORTEH

NEW Cortex Expert Pure sensations

A CDS (Cortex Dampening System) interface transmits useful information to the player and the new handle design brings that information closer to the player's hand for perfect control on every hit.

3 STEPS TO CHOOSE YOUR STRING

- WHAT IS MY PLAYER PROFILE AND MY FREQUENCY OF BREAKAGE?
 PROFILE A: I'm looking for power and comfort and I rarely break my strings.
 PROFILE B: I'm looking for versatility and I occasionally break my strings.
 PROFILE C: I'm looking for durability and control and I frequently break my strings.
- WHAT IS THE ADDITIONAL BENEFIT I'M LOOKING FOR?
 POWER CONTROL DURABILITY COMFORT

OUR PACKAGING HELPS YOU!

DID YOU KNOW IT?

THE GAUGE (I.E THE DIAMETER) AND THE TENSION AFFECTS THE BEHAVIOR OF STRINGS.

GAUGE
A string gauge for more power and feel. A thicker gauge for increased durability.

TENSION
Each string has its own recommended tension, which corresponds to a standard. By reducing the tension, the strings will provide more power and control. Increasing the tension will make the string feel stiffer, for greater control.

HYBRIDS

By selecting two different types of strings, one for the main and another one for the crosses, Hybrid technology allows you to take advantage of the combined benefits of each string to create a winning combination for each player.

BABOLAT OFFERS YOU FIVE WINNING COMBINATIONS.

- PRO HURRICANE TOUR + VS
- PRO HURRICANE TOUR + NYV
- PRO HURRICANE TOUR + XCEL
- PRO HURRICANE TOUR + RPM BLAST
- PRO HURRICANE TOUR + SYNTHETIC GUT

Power & Comfort	Comfort & Control	Control & Durability	Power & Comfort	Comfort & Control	Control & Durability
<p>X-ONE BIPHASE Leading string technology for maximum power and feel. This string plays and feels like natural gut.</p>	<p>TGV The highest PU concentration of 45% for maximum comfort. Perfect for those who suffer with tennis elbow.</p>	<p>XR1 New P.A.P. Core providing durability, higher shock resistance, and greater tension maintenance. The core shape allows 1125 filaments to be packed in around it for a dynamic performance!</p>	<p>DURAMIX HD 50% polyester, 50% polyamide multifilaments. Recommended for every player wanting an all round string that provides, power control & durability. All-in-one hybrid string.</p>	<p>X.CODE 100% polyester multifilaments. The firm feel and sound of polyester with the added benefit of shock absorption from the PU HD formula.</p>	<p>BLACK CODE One of the most comfortable monofilament polyester strings on the market due to its elastic construction. The pentagonal cross-section provides optimum spin.</p>
<p>RUFF CODE The Biphase grates provides increased durability and a rough surface for increased spin, whilst the thermocore technology softens the string and increases tension maintenance.</p>	<p>PRO RECODE Extra durability for big hitters through its high quality co-polymer monofilament construction.</p>

Shock Shield is a great system for players looking for comfort and feel in all of their tennis accessory products.

Developed for players with arm discomfort, new Shock Shield string has a gel filled core which helps reduce shock and vibration. The construction eases tension for complete comfort and control for the avid or recreational player. The string works in combination with the new Shock Shield Hybrid grip, as well as the Shock Shield vibration dampener, made with IsoZorb Gel for maximum comfort.

Without Competivision

With Competivision

Bolle's COMPETIVISION® lenses act like a filter to mute the colour spectrum except optic yellow, making the ball pop out of the background. The frames include rubber nose pads and temple tips to provide ultimate comfort and security during active use. Bolle's competitivision lens is so effective, they are the official supplier of sunglasses to Tennis Coach UK.
